Objectives

The purpose of AYA Bank Lactation Support Program is to support the working mothers at their start of the journey working as a mother and encourage the breastfeeding activity which is the best for the early development of a child.

Workplace Lactation Policy

We developed this lactation program under the closed guidance of UNICEF Myanmar. This program encourage our working mothers to be able to have a comfortable working environment while they could keep the breastfeeding activity for their children. All the breastfeeding mothers get the break time during working hours to keep the breast milk at the provided password-protected lactation room.
